B-Tag Meeting 24 May 2002

- Generator level b-jet studies continued (Carsten Rott)
- Updated offline defaults for B-Tag group (Aaron)
- AOB

Don't Use 4.5.0int5 ;(

- No good frozen release for tracking, yet...

- Will need to use integration releases until 4.6.0.

- Previous recommendation 4.5.0int5 has problems
  - PVFinder had a memory overwrite thanks to abuse of CERNLIB
  - DHMods had a bug preventing saving of output files

Don’t Use 4.5.0int5 ;(

- Version 4.5.0int7 fixes bugs but needs a patch. You need to back out the latest SiGeometry:

```
   setup cdfsoft2 4.5.0int7
newrel -t 4.5.0int7 4.5.0int7
cd 4.5.0int7
addpkg SiliconGeometry
cvs update -A -rv4_5_0int5 SiliconGeometry/SiliconGeometry/DetailedHalfLadderInit.hh
addpkg Production
gmake nobin Production.bin
```
