

Multi Jet Higgs Status

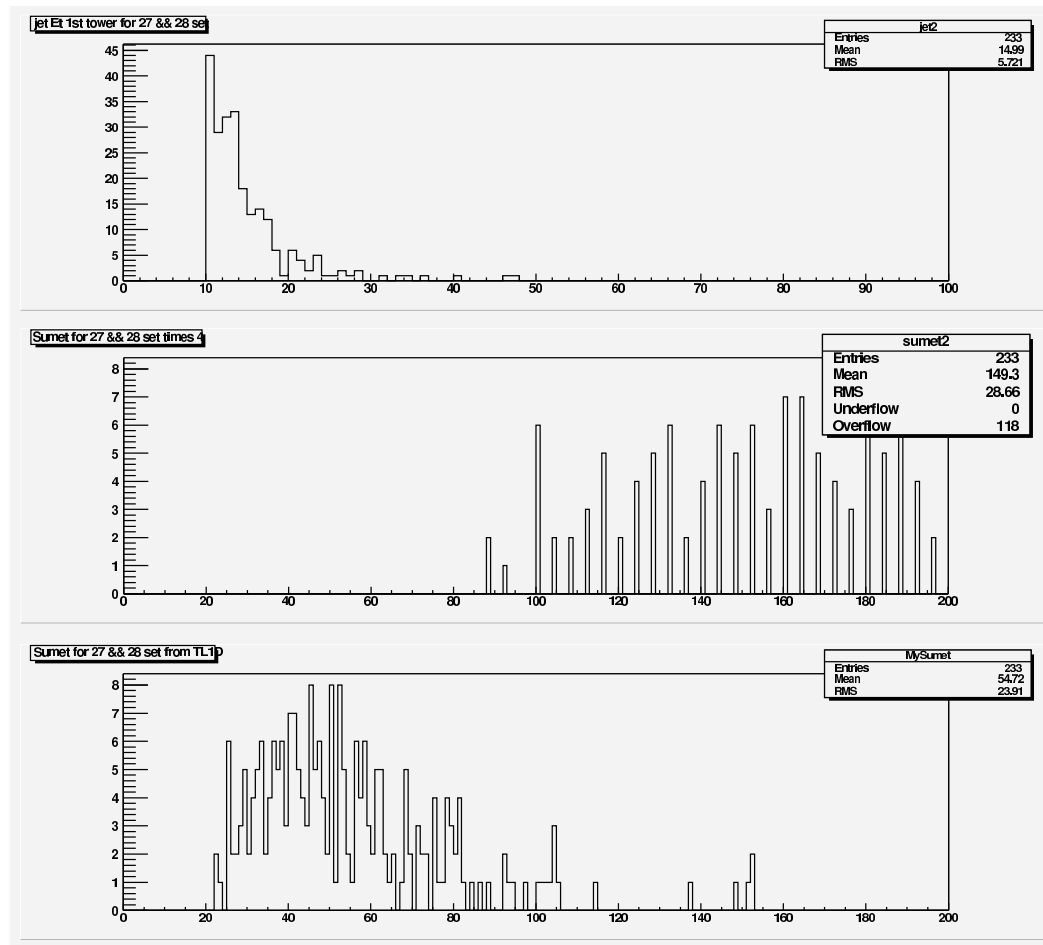

- Aaron and Lauren measuring
 - HIGGS_MULTI_JET trigger stability
 - 4-jet QCD background using 2-tag-bin-normalization technique
 - Investigating newly implemented trigger
- Pete and Jared (Steve)
 - Getting GRAPPA to run with generator-level cuts for QCD MC bkg
 - CL calculation tools
- Kevin investigating means of measuring trigger eff from data

TRGSim++ Problem

Simulation of run 151435 still has L1 problems, not seen in data.

TRGSim++ $\sum E_T^{\text{jets}}$ Off by Factor of 4!

L1 Triggers in 151435 Seem OK
