level 7 jet corrections.

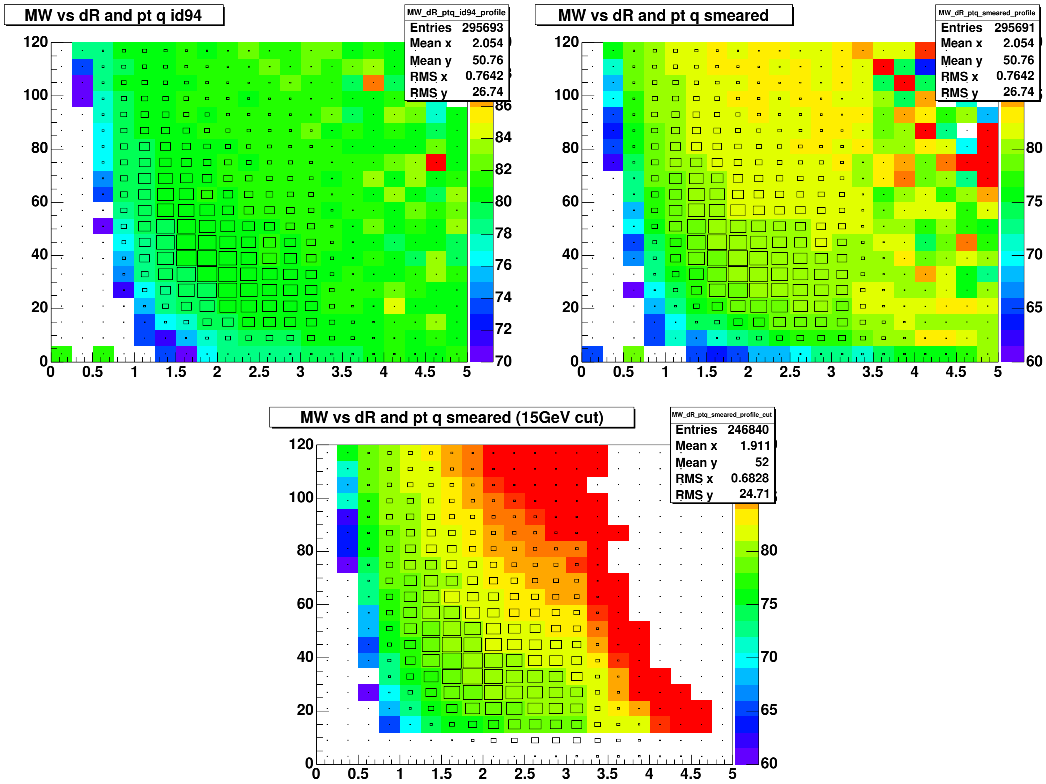

Figure 8: P_T of the q quark versus Δ R between the q and the qbar. The side bar colors indicate the W mass scale, the boxes indicate the number of events. a) MW-vs Δ R for id=94 jets. b) after jets are smeared. c) after a PT cut of 15 GeV/c cut on the jets. d) MW after simulation with jet cut at 15 GeV/c and level 7 corrections.
